BUILD AD OPPORTUNITIES AND GENERATE MORE REVENUE STARTING TODAY

Engage consumers at a higher level. HD Radio technology allows you to deliver exciting new connection points for your clients – new ad opportunities that will drive their business and build your ad revenue. It all begins with one simple addition: make in-vehicle display ad options a standard on your rate card. And from there, the road is wide open.

WAYS THE SCREEN CAN INCREASE ENGAGEMENT

- Sponsor Station Guides or Now Playing Screens
- One-Touch Interaction with Local Radio Stations adds new possibilities to contests, sponsorships and promotions
- Map to your advertiser’s nearest location, utilize navigation to locate an advertiser
- Bookmark songs and advertisements

Find out how your station can garner even more revenue with HD Radio tools.
HOW TO ADD ENHANCED ADS TO YOUR RADIO STATION

**FIRST**

- **Check with your Chief Engineer** and see if your station has a TagStation™ subscription or Artic Palm™, Jump2Go™, BE/TRE™ or other HD Radio image integration software.

- **Have your engineer** insure this third-party software is interfaced with your station’s existing automation system.

**THEN**

- **Have your client provide a .jpg or .png image** of the visual they wish to appear on properly-equipped HD Radio receivers when their spot plays.

- **Your traffic director schedules** the spots as they normally do, and the third-party software (Arctic Palm or another) will automatically pair the audio with the proper client visual.

**FINALLY**

- **The image will be displayed synchronized with the audio being broadcast when the client’s spot airs!**
ABOUT THE HD RADIO AD STUDY

HD Radio partnered with Nielsen to conduct a study about the impact of different in-vehicle platforms on ad awareness and recall. (See “Survey Methodology” for more)

ENHANCED AD:
Audio played with image and text appearing on in-vehicle display

AUDIO-ONLY AD
Only the audio was played

The advertisers in our survey were a:

HOME IMPROVEMENT RETAILER

and an

AUTO DEALERSHIP

We presented listeners with two radio ads using graphics that simulate the driving experience. The spot began with a short piece of music, followed by an ad for the Home Improvement Retailer and the Auto Dealership. Ads were Enhanced or Audio-Only

SOURCE & METHODOLOGY

Survey respondents are 1,204 adults 18–64 who own or lease at least one vehicle. Survey dates 7/27/16-8/10/16. Listeners refers to the respondents of this survey

* Baby Boomer respondents are ages 55–64
** Full survey question asked was: “When you are driving in your car and the radio is on, how often do you read any scrolling text that appears on your display?”
