WHY ASSESSMENTS?

Data trumps hunches and prevents bias from corrupting important decisions. Throughout the latter half of the 20th Century, Fortune 500s relied on behavioral & cognitive assessments to inform all aspects of their personnel decisions—from an employee’s initial selection and training to their team role and eventual promotion. These paper-based assessments had to be individually calculated by a highly trained professional, making them too expensive for most organizations to afford. However with the advancement of new computer technologies and algorithms, the cost of such assessments has dropped measurably, leveling the playing field for businesses of all sizes.

Improve Hiring & Selection
The right person in the right job is priceless. The wrong one is a nightmare waiting to happen. Accurately identify job applicants BEFORE the interview, make scientifically informed judgments and build an organization of A+ employees.

Increase Sales
Teach your sales team powerful behavior profiling skills. Empower them to identify—to your organization’s advantage—observable behaviors, then adapt their selling style to fit the customer’s buying style.

Improve Customer Service
Know in advance that your people believe in your organization and care about your customers. Better equip and train your customer support team with the invaluable communication and behavior profiling skills that pay countless dividends.

Increase Productivity
Identify with scientific accuracy the strengths and shortcomings of each employee. Create observable action plans, from the data, that maximizes your organization’s talent.

Reduce Employee Turnover
Ensure the best possible positional job “fit” for each new hire. Great fit means stronger retention rates, which lowers the costs associated with turnover.

Customize Employee Training
One size fits ONE, not all. Learn how each person learns best and get them back to productivity sooner.

Model Team Building
Know who fits with whom in advance. Create your teams based on compatible skills and traits, not just generic ideas of balance. Top-level teams are comprised of behaviorally compatible members with an optimal array of complimenting proficiencies.

The Executive Summary is a multi-dimensional tool, developed over 25-years, to answer any company's hiring and selection questions. The Executive Summary demystifies human performance questions with concrete performance answers and recommendations. This revolutionary instrument works by measuring and integrating:

- The applicant's critical thinking capacity via *The Hartman Value Profile*.
- The applicant's likely action steps, based upon what *they want*, via the Harvard based *Motivators* research.
- The applicant's DISC behavior/communication style utilizing a newly integrated model that was developed to specifically identify the individual's level of effective interpersonal workplace dynamics.

Each Executive Summary report provides users actual answers and specific recommendations, calibrated to one of FOUR different job categories...

1. LEADERSHIP & MANAGEMENT
2. SALES & MARKETING
3. CUSTOMER SERVICE
4. GENERAL ADMINISTRATIVE

Revealing scoring and data that's easy to understand at-a-glance. Aren't you tired of assessment reports that reference hundreds of disconnected data points? Now, you can get both a performance overview and a hiring recommendation.

Time-tested social science integrating Nobel nominated decision capacity research with Harvard based studies into internal motivation. The Executive Summary only draws from the most credited assessments, with proven track records of accuracy and efficacy.

An easy-to-understand eight-page report that extracts & integrates the essential performance elements from a more detailed 54-page analysis. This already concise report dovetails even further by providing end users with a one-page summary containing specific recommendations.
