How concerned are you about being in public spaces right now? - Weekly Percentage

> All respondents in segment Canonical - United States (includes PR) in network CivicScience Network > Weighted according to U.S. Census figures for gender and age, 18 and older

Generated by CivicScience ® on Aug 18, 2022 at 22:31:20 EDT

Are you eating at home (Including takeout and delivery) or eating out more than you usually do for this time of year? - Weekiy Percentage

> All respondents in segment Canonical - United States (includes PR) responding in the last 3 months in network CivicScience Network > Weighted according to U.S. Census figures for gender and age, 18 and older

How do you feel about your household income today? - Monthly Percentage

> All respondents in segment Canonical - United States (includes PR) in network CivicScience Network CivicScience Network according to U.S. Census figures for gender and age, 18 and older

Over the past 12 months, have you become more or less price sensitive? - Monthly Percentage

> All respondents in segment Canonical - United States (includes PR) responding on or after 12/01/2020 in network Ci > Weighted according to U.S. Census figures for gender and age, 18 and older

What we've seen and expect to see

The Holiday Season in brief.

© 2022 CivicScience, Inc. All Rights Reserved | Proprietary and Confidential

Last year, consumers began their holiday shopping earlier than usual, presumably to get ahead of supply chain issues.

How far along are you in your holiday shopping?

(% I have started)

* 21,658 responses (Rebased among holiday shoppers) weighted by US Adults from 09/26/2019 to 12/25/2019 | ± 1%

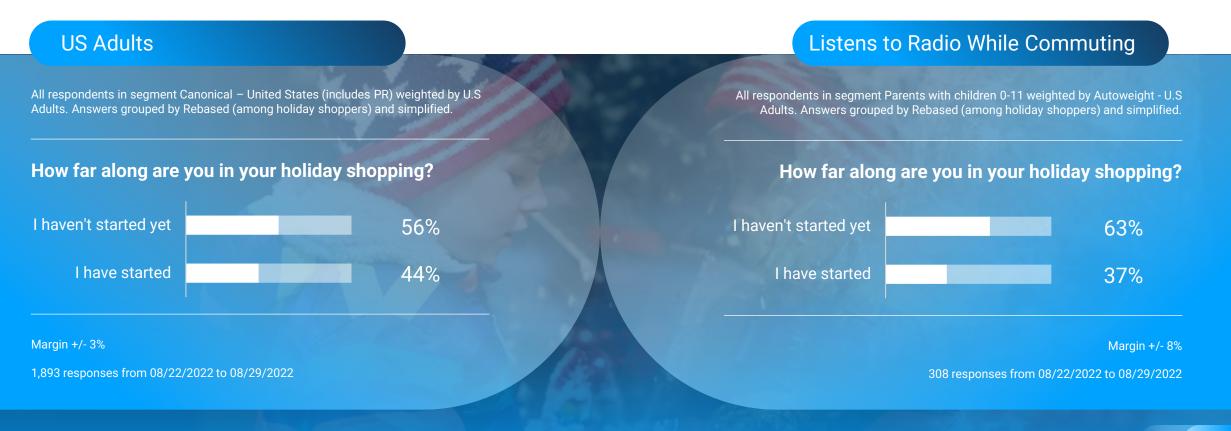

** 29,632 responses (Rebased among holiday shoppers) weighted by US Adults from 09/23/2020 to 12/31/2020 | ± 2%

*** 25,505 responses (Rebased among holiday shoppers) weighted by US Adults from 09/29/2021 to 12/31/2021 | ± 1%

Radio is a way to reach those that are still waiting to get started, particularly during the commute.

How far along are you in your holiday shopping? (% I have started)

Why You Care:

If shopping starts earlier, your consideration window is smaller, or you risk only reaching customers once they're already wrapping up for the season.

Nearly a third of holiday shoppers (31%) have already begun their shopping for this year, which according to the slide earlier, already puts them ahead of where holiday shoppers were in early October of 2019 and 2020 and has already reached the point holiday shoppers were at the end of September last year (in 2021).

Our clients are already in market measuring this and adjusting their strategies to accommodate the market conditions. How far along are you in your
holiday shopping?*
(Aug 22-29, 2022)%I haven't started yet69%

I have started 31%

*1,893 responses (Rebased among holiday shoppers) weighted by US Adults from 08/22/2022 to 08/29/2022 | ± 2%

After record breaking holiday spend seen in 2021, 24% of holiday shoppers anticipate spending *more* this year, but that's compared to 26% who say they anticipate spending *less*.

How much do you expect to spend this holiday season as compared to last holiday season?*

Will spend more	24%
Will spend about the same	50%
Will spend less	26%

%

In fact, consumers are feeling significantly more price sensitive now than compared to the same time over the last three years.

Over the past 12 months, have you become more or less price sensitive?*

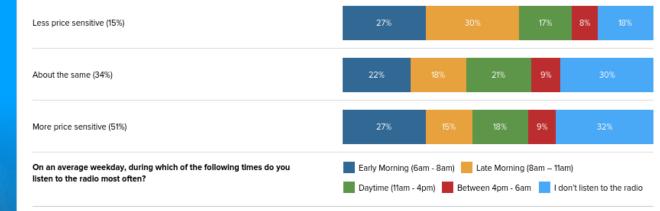

*220,465 responses weighted by US Adults from 08/01/2019 to $08/24/2022 | \pm 1\%$

Those who are less price sensitive are more likely to be radio listeners. Marketing higher priced items may find traction over airwaves. Over the past 12 months, have you become more or less price sensitive? compared with On an average weekday, during which of the following times do you listen to the radio most often?

> All respondents responding in the last 3 months > Weighted according to U.S. Census figures for gender and age, 18 and older

Over the past 12 months, have you become more or less price sensitive?

9,918 responses. Significance: X²(df=8)=247.321, p<0.001, Medium Strength of Association (T=0.094)

Generated by CivicScience ® on Oct 17, 2022 at 10:25:30 EDT

*829 responses (Rebased among typical holiday travelers) weighted by US Adults from 08/19/2022 to 08/24/2022 | ± 6%

Why You Care:

You don't get to choose what your consumers want, you can only choose how you meet their needs. Swim upstream if you want, but here's the path of least resistance and highest efficiency. Oh, and these numbers won't be the same in one month, meaning your messaging needs to update alongside consumer expectations.

Which of the following will be most important to you when deciding where to shop for the holidays this year?*	%
Deals / promotions	32%
Free shipping	21%
Product availability	20%
Expedited shipping	5%
Buy now, pay later options	4%
Curbside pickup option	3%
Other	15%

Do you typically travel for the holidays, and if so, do you still plan to do so this year?*	%	
usually travel, and I still plan to do so this year	58%	
usually travel, but it's unlikely that 'll do so this year	42%	

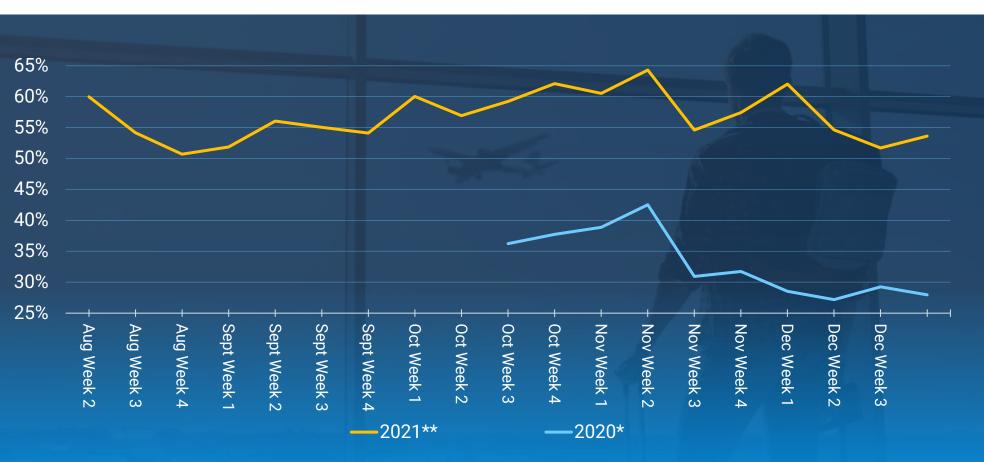

*829 responses (Rebased among typical holiday travelers) weighted by US Adults from 08/19/2022 to 08/24/2022 | ± 6%

As we've seen the past two years, holiday travelers have regularly had their travel plans interrupted throughout the holiday season (mainly because of COVID), so it's very possible we could see some of that happen again this year.

Do you typically travel for the holidays, and if so, do you still plan to do so this year?

(% of typical holiday travelers who still plan to do so this year)

*4,199 responses (Rebased among typical holiday travelers) weighted by US Adults from 10/20/2020 to $12/24/2020 | \pm 3\%$

**11,201 responses (Rebased among typical holiday travelers) weighted by US Adults from 08/16/2021 to 12/24/2021 | ± 2%

Do you typically travel for the nolidays, and if so, do you still plan to do so this year?*	%	
usually travel, and I still plan to do so this year	58%	
usually travel, but it's unlikely that 'll do so this year	42%	

*829 responses (Rebased among typical holiday travelers) weighted by US Adults from 08/19/2022 to 08/24/2022 | ± 6%

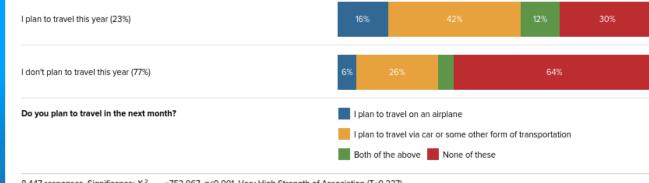

For those that are planning to travel, the car is still the preferred method, meaning lots of potential for radio time.

Do you typically travel for the holidays, and if so, do you still plan to do so this year? compared with *Do you plan* to travel in the next month?

> All respondents responding in the last 3 months > Unweighted

Do you typically travel for the holidays, and if so, do you still plan to do so this year?

8,447 responses. Significance: X $^{2}_{(df=3)}$ =752.067, p<0.001, Very High Strength of Association (T=0.227)

Generated by CivicScience ® on Oct 17, 2022 at 10:26:37 EDT

*829 responses (Rebased among typical holiday travelers) weighted by US Adults from 08/19/2022 to 08/24/2022 | ± 6%

Why you care:

It's still the holidays. People will figure out nostalgic traditions they refuse to let go of. They will see their family, whether it's digitally or in person. That has a trickle down impact on everything. Every category starts at the top, and the top of the food chain is the customer, and the customer makes decisions based on how they feel, now how you want them to feel.

What are your main priorities this holiday season? (Please select up to 3 answers.)*

Other	13%
Getting the best deals on holiday shopping	15%
- Making the holidays feel extra special this year	20%
- Getting 'back to normal' / returning to pre- COVID celebrations	22%
Giving meaningful gifts	22%
Following holiday traditions	32%
Staying safe and healthy	45%
Seeing friends / family	53%

Key Findings Review

Holiday shopping seems to be starting earlier and earlier.

- 1. We saw consumers shopping earlier than ever for the holidays last year because of supply chain issues, and we see leading indicators that would suggest the same this year (slides 4+5 in attached deck).
- 2. This is even more so the case for parents with younger children, who are 1.5x as likely as the average adult to have started their holiday shopping already (incorporate data below).

For parents of young children, in particular, they're expecting to spend more this holiday season <u>amid rising toy prices</u>, which means making compromises elsewhere.

- 1. Unlike for most Americans, Parents with young children expect to spend *more* on the holidays this year, as many **major toy brands have hiked their prices**.
- 2. Increased spending on gifts, however, may mean some parents having to make some financial compromises elsewhere. In fact, parents with younger children who typically travel for the holidays say they're less likely to do so this year, setting them apart from other adults (incorporate data below).

 \rightarrow As we've seen with things like in-person gatherings, travel and online shopping, the past two holiday seasons have been extremely unpredictable.

How to Win the Holiday Season with CivicScience

Ţ

The Holiday Tracker will be produced and delivered to our partners on a monthly basis from now to January.

Our intent of the Holiday Tracker is to serve as a monthly, directional forward-looking source of data for you and your team to keep ahead of the customer before, during, and post the holiday season.

We do this by tying your segments and category to our always-on syndicated data to provide a real time anticipatory view of holiday trends.

If you'd to learn more, please reach out directly or book some <u>time.</u>

Looking forward to connecting and winning the holiday season, Together!
